

ABSTRACT OF THE DISCLOSURE

An image processing method which is used to confirm a layout when an image is formed onto a recording medium on the basis of an application. The
5 method includes: an image forming step of forming the image based on the application; and a display control step of controlling a process for displaying the image so that a portion corresponding to the inside of the recording medium of the image formed in the
10 image forming step and a portion corresponding to the outside of the recording medium can be discriminated.
